## Top Skills

Laravel

Django

Vue.js

# Chad Riden

Language-Flexible Full Stack Developer - PHP, Python, JavaScript  
Glenmont

## Summary

I'm a top-performing, very language-flexible full stack developer with 9+ years of experience in responsive web development using PHP, Laravel, Python, Django, React, Angular, Vue, Tailwind, Node, JavaScript, TypeScript, MongoDB, PostgreSQL, and the cloud platform at New York's leading IT companies. My work experience includes a wide range of software development, from software architecture, database design to website/web app development. I have worked with the Agile development methodology to build test-driven code both as a developer and as a scrum master and have experience with many software design models & patterns like MVC, Singleton, etc.

Also, I work well with other team members (mentoring and leadership) and always find the opportunity to brainstorm.

I love creative, innovative companies/clients who focus on improving their products, as well as the growth of their employees.

My other interests include golf, gaming, and music.

---

## Experience

### Transfuture Web Design

#### Full Stack Software Developer

2018 - 2021 (3 years)

New York, NY, United States

- Responsible for creating new features with React, using React Hooks, and the latest ES6 features. Used Redux for state management and optimized state as needed.
